**Technologies:** HTML, CSS, JS, PHP, Laravel, Postgresql, Docker, Git, Figma, Microsoft SQL Server, Cisco

**Soft Skills:** Critical Thinking, Effective Communication, Problem Solving, Self-Learning

## Projects

**Draco footwear**

github.com/Dracofootwear ↗

- Luxury footwear e-commerce site built from scratch. Includes full branding, frontend and backend development, digital media creation, and product showcase video integration.
- Tools Used: HTML, CSS, JS, PHP, Vercel, Figma

**Los Revolucionarios**

github.com/losrevolucionarios ↗

- Website for a Mexican restaurant featuring visual presentation of dishes and admin panel for updating content. I worked on frontend development, UI design, iconography, and food photography.
- Tools Used: HTML, CSS, JS, Figma, React + Vite

**Threat Monitoring with T-Pot**

(Private Server) ↗

- Deployment of a honeypot-based platform using XenServer, Docker, and Ubuntu Server. T-Pot exposes vulnerable services to the internet to attract attackers and log their intrusion attempts. The captured data is visualized using Kibana (Elastic Stack).
- Tools Used: Docker, Ubuntu Server, XenServer, Elastic Stack
